

«Advantages and Disadvantages of Online Education»

You can endlessly call advantages and disadvantages of online education, but I want to highlight the main of these parameters. First, you cannot go to bed at all, have a lot of free time and energy. Secondly, you can walk every day and forget about studying.

But all these actions have their consequences, they are also cons: one day you will have to do all your homework in one day. You also make yourself and your teachers uncomfortable. But then there is a huge plus online education, it is the Internet and complete freedom of action. Did your teacher give you a lot of homework and a difficult test? You won't have any problems.

However, the most important disadvantage is that you have to choose between knowledge and leisure, and often the second option wins. Congratulations! Now you are dumber and you will be expelled!!
